events

Recently enacted laws have changed the landscape for home kitchen produced food, catering and donated food. Join us for a webinar on January 23rd to learn about the law changes and potential opportunities. Donna Fenton Director of the County of Kern Environmental Health Division will discuss the new changes. She oversees many environmental health programs including the Food Program which issues health permits to all food establishments and home based kitchens county-wide. She developed and launched the Safe Diner app, a custom-built smart phone and tablet application that can be used to read inspection reports for more than 1,800 restaurants in Kern.

Hosted by:

Upcoming Webinars:
2/6: State of Small Business
2/20: Selling & Buying a Business
